

**REMAIR**  
High Volume Low Speed Fan Systems

**CHANGE  
IS IN THE AIR!**

**2 YEARS  
Warranty &  
Certificate of Use**

## Big Saving In Big Spaces With REMAir HVLS Fans

### Extra Power Bearing

As a result of the extra bearing function, it does not create an axial load in the system and provides a long-lasting transmission.

### Specially Designed Gearbox

The power transmission system has been produced by Remak Gearbox specially for fans and includes durable and strong gears.

### Aerodynamic Aluminum Wing

The blades, which are specially produced from aluminum with "Aerodynamic" equations, provide maximum air displacement with angular adjustments.

# WHY REMAIR HELICOPTER FAN ?

**Powerful as a helicopter, but so quiet that you won't notice it's working.**

**Fresh Air**  
It provides a clean air flow where fresh air is circulated in large areas.

**Wide Air Conditioning**  
Eliminates air-conditioning problems in large spaces.

**Air Pollution**  
It helps to remove hot and polluted air and bad odors.

**High Savings**  
Compared to existing cooling systems, it is much more economical in terms of cost, application and maintenance.
